Narratives

Disaster Damage:

Hurricane Matthew began as a Category 5 storm in the Caribbean, before hitting the coast of North Carolina (the State) on October 8, 2016. Fifty counties in North Carolina were declared federal disaster areas with historic communities in eastern North Carolina like Princeville, Kinston, Lumberton, Goldsboro, Fayetteville, and Fair Bluff experiencing catastrophic damages. Matthew lingered along the North Carolina coast for several days, causing rivers and their tributaries to swell and ultimately overflow into adjacent communities. Over a three-day period, central and eastern parts of North Carolina were inundated with rain, and 17 counties set new records for rain and flooding. Five river systems, the Tar, Cape Fear, Cashie, Lumber, and Neuse Rivers, flooded, remaining at flood levels for two weeks.

After Matthew passed, the State assessed the damage and documented that Matthew's impact was devastating, significantly impacting residents in eastern and central North Carolina and causing catastrophic losses in the housing, business, public infrastructure, and agricultural sectors. More than 800,000 families lost power from Matthew, resulting in millions of dollars in food cost losses for families whose food needed to be frozen or refrigerated. In total, 3,744 individuals needed to be moved to shelters, and 77,607 households applied for Federal Emergency Management Agency (FEMA) emergency assistance.

When FEMA completed its analysis of impacts on housing stock, 34,284 households had evidence of flood damage and nearly 5,000 homes had major to severe damage, many of which were located in rural communities, where not only the home but also the farm and livestock were impacted and/or lost. The State estimated that more than 300,000 businesses experienced physical and/or economic impacts from the storm, including many small "mom and pop" businesses located in small rural communities. Matthew's impact on the agricultural industry was particularly hard hit, as the industry has a significant presence in driving the local economy in eastern North Carolina, where the State is among the leaders in the nation in livestock and crop production. North Carolina's farms, including many small multi-generational family farms, along with the firms that provide materials needed to grow livestock and produce crops and food producers that take these products to market, lost tremendous amounts of inventory, livestock, and crops, with millions of dollars of the losses not covered by United States Department of Agriculture (USDA) programs. The impact on communities was also catastrophic, with public buildings, parks, schools, roads, water and wastewater systems, and other public infrastructure heavily impacted. Portions of the interstate system closed in some cases for up to 10 days. In total, the State estimated that Matthew's total economic impact was roughly \$2 billion.

Recovery Needs:

The Impact and Unmet Needs Assessment within this Action Plan represents the third analysis of unmet needs in the State of North Carolina following Hurricane Matthew. It presents damage estimates as of October 15, 2017, roughly one year after the flooding occurred. Under Substantial

Amendment 10, the State used the most recent State damage inspection data, Small Business Administration (SBA), Federal Emergency Management Agency (FEMA) and National Flood Insurance Program (NFIP) data to reevaluate unmet needs specifically related to owner-occupied housing, rental housing, and infrastructure. Reanalysis of the owner-occupied and rental housing unmet need under Substantial Amendment 10 indicates that the housing unmet need remains largely unchanged when compared to initial housing unmet need estimates. Through reanalysis of the infrastructure unmet need under Substantial Amendment 10, the State found that the infrastructure unmet need has decreased significantly when compared to the initial infrastructure unmet need estimates. The reanalysis highlights that additional Federal Obligations have been made through the FEMA Public Assistance (PA) program to address infrastructure unmet needs since the initial estimates were calculated in October 2017. Additionally, a considerable amount of funding from the State has been awarded and spent to address the match for federal disaster programs related to infrastructure recovery. Based on the reevaluation, North Carolina's current unmet recovery needs for Hurricane Matthew total \$777,374,146.

Under Substantial Amendment 10, funding allocated to CDBG-DR activities will address owner-occupied housing, rental housing and economic (small business) unmet need, representing 89% of the total unmet recovery needs. The State has also identified an additional need for public services to support recovery efforts, with an estimated need of \$36,248,561. Public Housing and Infrastructure represent 11% of the total unmet recovery need (\$85,661,799). In consideration of the significant owner-occupied housing, rental housing and economic recovery need, funding allocations for public housing and Infrastructure are being reallocated to the State's CDBG-MIT program under Substantial Amendment 10. Refer to the State's Mitigation Action Plan for more details on these activities and any additional unmet needs analyses. The decrease noted in infrastructure unmet need further supports the State's decision to focus CDBG-DR funding on the significant unmet need that remains for owner-occupied housing, rental housing, and economic recovery.

Since the publication of the State's initial Unmet Needs Assessment in the Spring of 2017 and subsequent amendments, the State has focused recovery actions in four areas:

1. Beginning to design housing programs focused on the findings of the State's initial Unmet Needs Assessment and centered around the needs of low to moderate-income persons and housing recovery in the most impacted communities and counties;
2. Completing the State's 50-county planning process to determine how to best align and structure the Community Recovery Program/Infrastructure Recovery Program with information and projects developed through this bottom-up community planning process;
3. Working with FEMA to ensure that damages to public infrastructure were captured; and
4. Working to confirm that the Matthew impacts on small businesses and the agricultural sector are being addressed through state, local, and other funding and activities outside of CDBG-DR.

As a result, the current reevaluation of unmet needs has validated that the State's prior Unmet Needs Assessment remains valid as housing recovery remains a significant unmet need. The public infrastructure and facilities focus of the Unmet Needs Assessment has been updated to reflect the increase in FEMA Public Assistance obligations that are in line with initial estimates and projections. In the Economic Recovery section, as shown by previous SBA data analysis, it remains possible that small businesses and agricultural enterprises in eastern and central North Carolina may continue to need assistance.

The analysis presented in the initial Unmet Needs Assessment, particularly for housing and vulnerable populations in most impacted communities, remains particularly relevant and is included in this revised analysis as it is unchanged and is a key component for the overall program design.

As part of this Action Plan Amendment, the State of North Carolina has made it a priority to focus on continuing to assist low- and moderate-income families who experienced severe flooding and saw their homes and communities impacted by Matthew. Therefore, the funding priorities in this Action Plan Amendment emphasize housing and supportive public service needs with the majority of this allocation going to housing recovery and housing assistance programs. The State understands that community health is not just about rebuilding homes but Hurricane Matthew CDBG-DR Action Plan 9 restoring the basic fabric of neighborhoods and ensuring future economic health. Therefore, the State is also providing funding to assist small businesses and farmers struggling to get back on their feet and ensuring that, as the planning process is complete, projects to rebuild and make more resilient communities can occur.

---------------------------------	--------------------------	------------------------

Location Description:

4500 Beagle Drive, Fayetteville, Cumberland County, NC 28311 is within a HUD-approved MID county. Census tract 25.03

Activity Description:

The proposed development involves the new construction of 80 units located in the northern part of Fayetteville, which is the fastest growing area in the city. The community will offer 12 one bedroom one bath units, 40 two bedroom one bath units and 28 three bedroom two bath units in six 2 story buildings. Phase II will share the existing leasing/community with Phase I. The partial completion of the 295 By-Pass from I-95 has provided significant growth in the area with single family developments and market rate apartments. The development will be located across the street from a very nice market rate development. Within one mile of the site there are two grocery stores, pharmacies, multiple shopping choices, many restaurants, banking, school, public library, recreation center with pool and medical providers. Methodist University is located in the general area and has enjoyed growth with the addition of new fields of study. As a result of these factors, there have been many additional shopping service and medical amenities added to the area.
